Manufactured by

IRSP

A Division of P&D Group Services Ltd

Our policy of constant research and development allows IRSP to offer unlimited design options and unrivalled product performance, all IRSP products have undergone rigorous testing to make sure that they not only pass, but exceed current industrial standards.

THE 'EFFICIENT' SOLUTION

IRSP

INSULATED ROLLER SHUTTER PRODUCTS

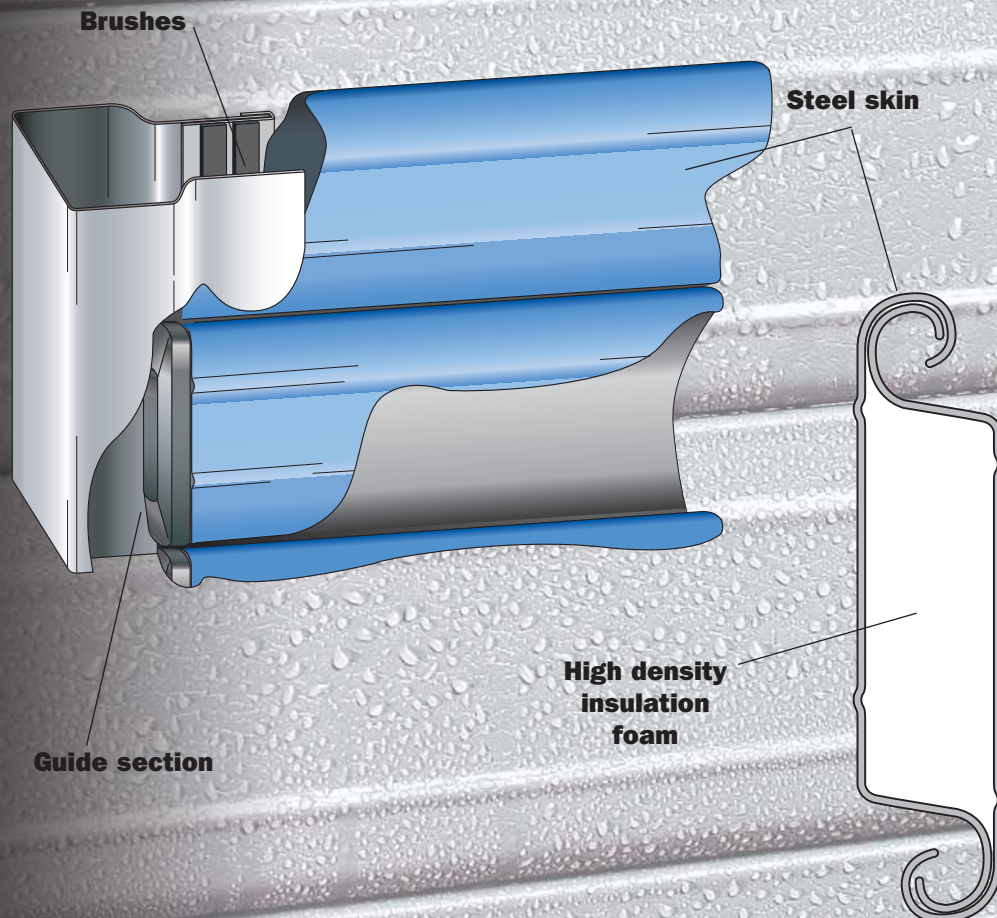

Insulated roller shutters are ideal for situations where energy conservation and protection against the elements, extreme noise and a high level of security are a primary consideration, such as:

- Warehouses
- Distribution centres
- Garages/factories
- Equipment noise partitioning
- Paint spray booths
- Maintenance buildings
- Storage facilities

Insuflex doors suit a wide range of applications from small security shutters to large warehouse openings

Insuflex meets today's architectural demand for aesthetics, reliability, performance and safety in use. It has been designed to withstand 20m/sec wind generation (745 wpa) pressure and special designs can allow for higher wind loads. Insuflex doors cut down energy waste due to heat flow through and around the door curtain. The sides are weather stripped with twin vertical brush seals on both faces of the curtain, and a rubber seals the bottom panel to the floor. The door brackets are multi drilled and mirror imaged for easy sit-on installation, all the head plates are finished in BZP with slot adjustment fixing.

IRSP Insuflex doors are custom made to fit any openings and are available in galvanised steel, plastisol coated or powder coated to suit any project regardless of its complexity.

Power Operation GFA Safedrive Operator

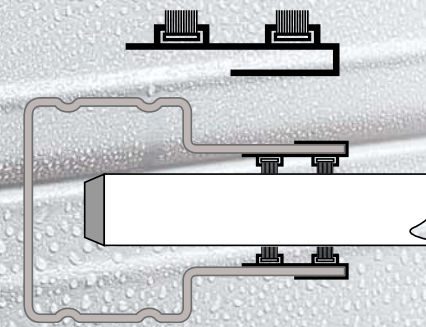

Benefits:

- Low maintenance
- Built in safety brake
- Direct drive to roller axle
- Motor controls built-on
- Proven in millions of worldwide installations
- Conforms to EC Regulations
- Manual over-ride via low level chain
- Life expectancy 100,000 door cycles

Brush Seals Co-extruded without gluing into ridged p.v.c. carrier

Benefits:

- Low maintenance
- Maximum draught prevention
- Protects surface finish
- Reduces operation noise

IRSP have a reputation for quality, unrivalled design capability and the most extensive range of roller shutter products in the UK.

Utilising the most up-to-date computer aided design software, superior craftsmanship, innovation and engineering excellence we continuously provide the highest quality products and best service in the industry.

All the parts carry a warranty against defects in material or workmanship.

Our policy of on-going research and development for all our products ensure that they remain the most revolutionary and finest engineered products available in the UK.
