PRODUCTS

The high speed Speedflex 550 is the most economical solution for frequently used building access, combining security with speed in just one construction. Its safedrive drive system and smooth quiet operation make IRSP Speedflex an excellent choice for:

- Hospitals
- Fire stations
- Car dealerships
- Industrial applications

Designed for external applications where speed, insulation and security are a necessity. It provides minimal heat loss with a sole reliable operation through a simple control panel that can be adapted for a range of activation methods. Motion detector, induction loops and hand held radio remote control unit for forklift trucks are also available. With automatic operation safety is of extreme importance when complying with the Provision and Use of Work Equipment Regulations. The Speedflex product is complete with self-monitoring Opto electronic safety edge and photocell safety to prevent contact with pedestrians and vehicles.

IRSP Speedflex doors are custom made to fit any openings and are available in Aluminium ARS polyamide coating, to suit any project regardless of its complexity.

IRSP uses the same basic components throughout its range of roller shutter applications. This design ethos means that all of IRSP's doors have been thoroughly tested in a variety of real life situations as well as being extensively tested in our workshops before being made available for sale.

IRSP is a name synonymous with the highest quality door products.

Automatic door control panel with automatic timed return

At the heart of the Speedflex 550 is its state-of-the-art electronic control panel. This control panel features a fast acting safety edge function designed to minimize the forces that can be exerted by the leading edge of the door.

The control panel is very quick and easy to programme with the aid of a clear display. The controls have been certified to be in conformity with BS EN 12543 and BS EN 60335-1 by an independent laboratory. It has many features including fault diagnostics and a cycles counter for service intervals/warranty purposes.

Features and Options

Twin signal traffic lamps

Polarised reflex photo beam

Motion Detector

Opto-electronic self-monitoring safety system

Radio Unit

Pull switch activation

IRSP have a reputation for quality, unrivalled design capability and the most extensive range of roller shutter products in the UK.

IRSP have a reputation for quality, unrivalled design capability and the most extensive range of roller shutter products in the UK. Utilizing the most up-to-date computer aided design software, superior craftsmanship, innovation and engineering excellence we continuously provide the highest quality products and best service in the industry.

All the parts carry a warranty against defects in material or workmanship.

Our policy of on-going research and development for all our products ensure that they remain the most revolutionary and finest engineered products available in the UK.
